

Alexandria Associates In Dermatology

2900 S. Quincy St., Suite 210

Arlington, VA 22206

June 2024

To our patients:

Some of you may note recent changes in the billing from our office. There is a new code labelled G2211 that you might sometimes see on your Explanation of Benefits (EOB) sheet that is added-on in addition to standard office visit codes.

The G2211 code reflects the time, intensity, and practice expense resources involved when providers conduct office/outpatient visits that build longitudinal relationships with patients and address the majority of a patient's health care needs with consistency and continuity over longer periods of time. It specifically addresses the evaluation and management associated with medical care services that serve as the continuing focal point for all needed health care services and/or with medical care services that are part of ongoing care related to a patient's single, serious condition or a complex condition.

This code was created by the Center for Medicare/Medicaid Services (CMS) and many private insurances also recognize and support use of G2211.

Please reach out to our office if you have any additional questions about this code.

Thank you.
